DETAILED ACTION

Specification

The abstract of the disclosure is objected to because The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 101

Claim 19 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim recites only a compilation of data, >signal,< per se does not appear to be a process, machine, manufacture, or composition of matter. >See, e.g., In re Nuitjen, Docket no. 2006-1371 (Fed. Cir. Sept. 20, 2007)(slip. op. at 18)(“A transitory, propagating signal like Nuitjen’s is not a process, machine, manufacture, or composition of matter.’ ... Thus, such a signal cannot be patentable subject matter.”).

Allowable Subject Matter

1. Claims 1-18 are allowed over the prior art of record.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
3. Magne et al U.S. Patent No 5,724,371.
